PROFILE | CAREER OBJECTIVE

Motivated and ambitious fourth-year student with a strong commitment to learning and personal growth. Studying BSc in Software Development with VR & Gaming at TUS Athlone. Proven ability in programming development and team-oriented projects within Agile environments. Seeking a 2027 post graduate job, to gain real industry experience and in-depth knowledge of company practices while seeking to improve skills.

EDUCATION

2023-2027 BSc (Hons) in Software Design with VR & Gaming ~ TUS Athlone, Ireland
Expected Result Overall: 85%
Modules Taken:

- Year 4 - Data Visualisation, Databases, Networks, VR and Technology, Distributed Systems, Security, Engineering in Society, Management & Organisational Behaviour and Final Project.
- Year 3 - Software Development, VR Application Development, Software Engineering, Networks, Software Development for Gaming, Game Development.
- Year 2 - Databases, Mathematics for Software Design2, Agile Methodologies, Game AI & Physics.
- Year 1 - Mobile Apps, Mathematics for Software Design1 connected Devices, Web App Development, Game Development and Immersive Technology.

Current GPA to date: 82.00

WORK EXPERIENCE

January – May 2026
XR / VR Development Placement (Erasmus Abroad) – HOWEST University of Applied Sciences | Bruges, Belgium

- Developed immersive VR training simulations using Unity and Unreal Engine for helicopter winching and communication systems.
- Implemented VR helicopter controls, environmental physics, spatial audio, multiplayer interaction systems, and user interfaces.
- Designed and optimized standalone VR applications for Meta Quest 3 and professional XR hardware deployment.
- Researched and integrated speech-to-text and communication systems using Unreal Engine Blueprints and external plugins.
- Created a Matterport VR Tour interface allowing users to navigate multiple virtual showrooms in VR.
- Troubleshot and repaired professional VR hardware including the professional Varjo XR headset through structured diagnostics and testing.
- Modified and integrated 3D assets using Blender, including helicopter controls, animations, and interaction points.
- Produced technical demonstrations and presentations for supervisors and stakeholders while incorporating iterative feedback.
- Performed extensive debugging, testing, and optimization to ensure stable VR performance and usability.

May – July 2026
XR / VR Development Placement– Global Logic | Athlone, Ireland

- Developed a website dashboard using HTML, CSS, and JavaScript to display company statistics, including employee attendance, working hours, team projects, and roles from uploaded Excel files.
- Collaborated with a team to develop a machine learning scheduling model for Midlands Steel, allocating machines to orders based on priority, weight, and deadlines.
- Worked with SQL, MongoDB, WSL, and Docker to support data management, development, and deployment workflows.
- Applied version control and industry practices while collaborating within a professional team.
- Gained experience in requirements analysis and translating business/ stakeholder requirements into technical solutions.

- Developed an understanding of government practices, standards, and project requirements while strengthening teamwork and problem-solving skills.

SKILLS PROFILE

- **Problem Solving & Debugging:** Developed strong troubleshooting abilities through resolving VR deployment issues, multiplayer communication bugs, headset configuration errors, and physics inconsistencies.
- **Project Management:** Managed multiple VR development tasks independently, prioritising deadlines, testing features iteratively, and delivering functional prototypes.
- **VR/XR Development:** Experience designing immersive simulations, VR interactions, environmental systems, and user interfaces using Unity and Unreal Engine.
- **Communication & Presentation:** Presented technical demonstrations and progress updates to supervisors and stakeholders, adapting communication to technical and non-technical audiences.
- **Research & Continuous Learning:** Conducted independent research into VR technologies, multiplayer systems, audio processing, and immersive interaction design.
- **Teamwork & Collaboration:** Worked closely with supervisors and stakeholders through feedback sessions, demonstrations, and collaborative troubleshooting.
- **Adaptability:** Quickly learned new tools and technologies including Unreal Engine, Blender workflows, OBS, VR hardware configuration, and plugin integration.
- **Customer Service & Interpersonal Skills:** Developed through waiter, cashier, retail, and hospitality roles in fast-paced environments.
- **Multilingual:** Fluent in Italian and English; proficient in French and Spanish.

TECHNICAL SKILLS:

- **Software Languages**: C++, C#, Python, Java, JavaScript, HTML, CSS, SQL.
- **Game Engines & XR:** Unity3D, Unreal Engine, Meta Quest Development.
- **IDEs:** Visual Studio, Visual Studio Code, Eclipse, Unity, Gamemaker, Scratch.
- **Version Control:** GitHub (Bitbucket) & SourceTree.
- **Agile Development**: Unit testing and Test-Driven Development.

ACHIEVEMENTS

- Received the Dean's Honours Engineering Award for 3 consecutive years, aiming for a fourth too.
- Successfully completed an Erasmus placement abroad focused on VR/XR software development and immersive technologies.
- Developed multiple functional VR prototypes including helicopter winching training simulations and communication systems.
- Delivered live and recorded demonstrations to supervisors and stakeholders.
- Participated in the 2025 NASA Space Apps Challenge Hackaton competition.
- Excellence Academic Achievement Award - Leaving Certificate (601/625 points).
- GMetrix Microsoft Office Certification.
- Participation in Young Enterprise and Green Schools initiatives.

INTERESTS | HOBBIES

- **Coding** – building small projects and experimenting with new programming languages, always looking for ways to sharpen problem-solving skills.
- **Piano** – playing piano is both a hobby and a way to unwind; wherever are classical pieces or modern songs or composing, playing piano is a great creative outlet.
- **Learning & improving** – naturally curious and enjoy setting new challenges every day, whether that's picking up a skill, trying something outside the comfort zone, working towards personal goals.
- **Gym & Workout** – training at the gym is part of the weekly routine, it helps with staying disciplined, motivated, and healthy.
- **Gaelic Football** – used to be a member of Athlone Garry Castle team, where teamwork, resilience, concentration and a strong community spirit were fundamental qualities developed.
- **Languages** – multilingual; fluent in Italian and English, with good proficiency in French and Spanish, which allows connections with people from diverse backgrounds.
